EXPERIENCE (1+ YEARS)

Dubizzle Labs —— Ruby on Rails, Postgres, AWS S3, Redis, Jira, Git   Mar. 2024 - May 2024

Software Engineer   *Lahore*

- Implemented Redis-based shopping cart functionality on Seller Center, optimizing performance by 40%.
- Developed and integrated a secure checkout process on Seller Center with 3-D Secure and non-3-D Secure payments, enabling seamless order finalization and online payment processing for Dubizzle's Seller Center.
- Implemented image uploading to AWS S3 buckets for product listings via presigned URLs, enhancing storage efficiency and security.
- Automated expiring credits' and monthly credits utilization, following complex criteria to maximize credit efficiency on Zameen.com.

Dubizzle Labs —— Ruby on Rails, MySQL, New Relic, Jira, Git   Sep 2023 – Mar. 2024

Associate Software Engineer   *Lahore*

- Spearheaded the development of a scalable invitation system for agencies for Bayut.com, integrating OTPs and shortened redirecting URLs to streamline user engagement and communication processes.
- Pioneered the implementation of an automated renewal system for listings, optimizing efficiency and management for agencies, contributing to increased user satisfaction and retention.
- Led the successful integration of user verification from Saudi Arabia's REGA system's licenses into Bayut.com, empowering 60,000+ users with enhanced permissions and fostering trust within the community.
- Migrated user messages from the legacy implementation to the Mailboxer system on Zameen.com, improving communication infrastructure.
- Implemented seamless dual-language support for Bayut.com, ensuring a consistent user experience.

PHP Intern —— PHP, MySQL, JavaScript, jQuery, Bootstrap   June 2023 – Sept. 2023

Suave Solutions   *Lahore*

- Transformed the company's portal through the development of several admin panel features, elevating user experience by implementing intuitive interfaces, enhancing data visualization, and optimizing performance.
- Streamlined system operations through the successful implementation of CRON files, enabling automated execution of essential tasks with precision.

PROJECTS

Dropella (E-Commerce Tools' App) —— Sveltekit, TypeScript, Tailwind, Supabase   Sept. 2023 – Current

- Led a team of 8 front-end developers, fostering collaboration with designers and back-end developers to deliver efficient and cohesive project development.
- Integrated 21 products, stores, and ads APIs, ensuring precise real-time analytics and enhancing overall app functionality.
- Implemented internal store tracking for sales' listings and details pages, maintaining data integrity and accuracy per client requirements.
- Utilized Tailwind and Daisy UI to craft a pixel-perfect, responsive UI, achieving a 95% Figma design fidelity for a user-friendly app interface.

EDUCATION

Lahore University of Management Sciences   Lahore

Bachelor of Sciences in Computer Science   *Aug. 2019 – June 2023*

TECHNICAL SKILLS

Backend Technologies: Ruby on Rails, Node.js, Express, PHP, Python, MySQL, Postgres, Supabase, SQL
Frontend Technologies: React.js, Svelte, SvelteKit, jQuery, HTML, CSS, SCSS, SASS
Utility and Version Control: JavaScript, TypeScript, Tailwind, Bootstrap, Git
Others: AWS S3, Redis, Daisy UI, New Relic, Jira, Notion
